

FOLLOW THE FLUID FERTILISER CODE

- ✓ Continually reassess tank location and ensure the base remains solid and stable to support a fully laden tank
- ✓ Check the condition of the tank, fittings and capacity before each delivery to avoid leakage
- ✓ Lock all fittings when not in use to prevent vandalism
- ✓ Maintain tanks and fittings to prevent corrosion. Consult tank supplier for guidance on inspection and maintenance if necessary
- ✓ Keep maintenance records
- ✓ You could be fined a substantial sum for any spillages that pollute the environment

IN THE EVENT OF TANK LEAKS AND SPILLAGE

- Follow contingency plans (eg earth barriers) to contain leakage
- If there is any uncontained spillage call the **ENVIRONMENT AGENCY EMERGENCY 24 HOUR HOTLINE 0800 807060**
- Call fertiliser supplier TEL: to remove fertiliser if tank leaks, to allow repair
- **DO NOT** spread spillage by hosing down
- Observe all health and safety instructions
